

List of Poster Abstracts

P01 Effect of chemical modification on the structural and rheological properties of starch from the tubers of *Plectranthus esculentus*

Elijah I. Nep, Ursula C. Kemas, Ndidi C. Ngwuluka, and Nelson A. Ochekepe

P02 Changes in the molecular structure and functional properties of whey protein isolate (WPI) caused by heat-induced interaction with sugar beet pectin (SBP) in solution

PX Qi¹ and Y Xiao

P03 Development of chitosan films containing α -, β -, or γ -cyclodextrin inclusion complexes for controlled release of food aroma.

I Zarandona, C Barba, P Guerrero¹, K de la Caba and J Maté

P04 Design of an oleogel, utilising high oleic sunflower oil with sunflower wax, as a shortening replacer for saturated fat reduction in short dough biscuits

Veronica Giacintucci, Lisa Methven, Julia Rodriguez Garcia

P05 Effects of stabiliser and accelerated storage on rheological, textural and physicochemical properties of high-protein peanut butter.

Adam Byrne and Julia Rodriguez Garcia

P06 Changes in the molecular structure and functional properties of whey protein isolate (WPI) caused by heat-induced interaction with sugar beet pectin (SBP) in solution

PX Qi and Y Xiao

P07 Influence of ferulic acid and intermolecular cross-linking on the emulsifying properties of sugar beet pectin

B. Bindereif, H. P. Karbstein, U. S. van der Schaaf

P08 Behaviour of aroma (1-hexanal and phenol) sorption on the properties of chitosan-gelatin edible films according the RH level

N. Benbettaieb, C. O'Connel, A.M. Seuvre and F. Debeaufort

P09 Potential of exopolysaccharides from lactic acid bacteria for the stabilisation of emulsions

G Surber, J Bulla, T Schauer, D Jaros and H Rohm

P10 pH-responsive release of trans-2-hexenal from chitosan films based on dynamic imine linkages and their application in antifungal packaging

R Heras-Mozos, R Gavara and P Hernández-Muñoz

P11 Effects of rheological and tribological properties of hydrogels compared to individuals' oro-physiological capabilities on oral processing behaviour

EM Krop, MM Hetherington and A Sarkar

P12 Integral valorisation of Faba-beans molecular compounds to nutritional texturized food products

Klara Nilsson, Rosana Moriana, Corine Sandström, Mikael Hedenqvist, Maud Langton

P13 Stability of β -Lactoglobulin micro- and nanostructures under various environmental conditions

LS Simoes, AA Vicente and OL Ramos

P14 Improving controlled-release antioxidant properties of tea polyphenol nanoparticles-loaded gelatin films by adjusting encapsulation efficiency

Fei Liu, John Antoniou, Wallace Yokoyama and Fang Zhong

P15 pH-responsive release of trans-2-hexenal from chitosan films based on dynamic imine linkages and their application in antifungal packaging

R Heras-Mozos, R Gavara and P Hernández-Muñoz

P16 Optical properties of regenerated cellulose and polyvinyl alcohol films combined with glycerol or chitosan

Patricia Cazón Gonzalo Velazquez, Manuel Vázquez

P17 Evaluation of the UV-barrier properties and transparency of bacterial and vegetable regenerated cellulose films combined with polyvinyl alcohol and chitosan

Patricia Cazón, Gonzalo Velazquez, Manuel Vázquez

P18 Mechanical properties of nanofibrils made from faba bean and mung bean protein

A Herneke, D Johansson, C Lendel, W Newson, M Langton

P19 Carrageenan sulfatases: controlling the sulfation moieties of carrageenans

S. Mathieu¹, K. Ako² and W Helbert¹

P20 Role of cuttlefish (*Sepia officinalis*) skin protein hydrolysates on the bioactive properties of gelatin-based edible films

H.Kchaou, M.Jridi, N. Benbettaieb, F.Debeaufort, M. Nasri

P21 Pickering emulsions stabilised by pea protein microgel particles: Influence of pH and ionic strength

Shuning Zhang, Melvin Holmes, Rammile Ettelaie and Anwasha Sarkar

P22 Acid gelation of enzymatically cross-linked caseins: From molecular level to network formation

N Raak, RA Abbate, S Boye, A Lederer, H Rohm and D Jaros

P23 Effect of fat concentration on structure and digestibility of o/w cellulose ether emulsions.

S. Martínez, M. Espert, A. Salvador and T. Sanz

P24 Technological characterization of marine fennel (*Crithmum maritimum*) extracts and the effect of its incorporation on the properties of edible films

Víctor Otero-Tuárez, Idoya Fernández-Pan, Teresa Fernández and Juan I. Maté

P25 Development and characterization of nano-emulsion-filled gels intended to supply omega-3 fatty acids into food products

Ana I. Bourbon, Marta Vieira, Miguel A. Cerqueira, Lorenzo Pastrana and Pablo Fuciños

P26 Carboxymethyl cellulose/lignin blended films: physicochemical and antioxidant properties

Michele Michelin, Arlete M. Marques, José A. Teixeira, Miguel A. Cerqueira

P27 The effects of polysaccharides incorporating into sodium caseinate-high melting point fat microparticles to the survival of probiotic bacteria during simulated gastrointestinal digestion and storage

Huan Liu, Joshua Gong, Steve W. Cui, Qi Wang

P28 Biological activities of enzymatically modified seaweed hydrocolloids

M Howlader, S Muzyed, R Tuvikene

P29 Using flour from oil flax seeds in technology of meat patés

O.N. Kliukina, N.A. Guskova, N.V. Nepovinnykh and N.M. Ptichkina

P30 Valorization of pectin from unripe papaya by conventional and subcritical water extraction

Santos Pedraza Guevara , Maria Helene Giovanetti Canteri , Maria Elena Ibañez Ezequiel , Revenli Fernanda Do Nascimento, Teresa Fernandez Ponce, Lourdes Casas Cardoso and Enrique Martinez de la Ossa

P31 Effects of caseinate-pea protein mixture on the physicochemical properties of oil-in-water nutritional emulsions and powders

Xiang Li, Yiming Feng, Biye Chen, Jiang Jiang, Yuanfa Liu

P32 Physicochemical, rheological properties and anti-oxidation activities of ulvan from *Ulva pertusa* Kjellm

Weishun Zeng, Jieteng Chen, Yunxue Li, Yifan Pan, Junyan Li and Hao Chen

P33 Physically crosslinked hydrogels based on poly (vinyl alcohol) and fish gelatin for wound dressing application: Fabrication and characterization

Liping Zhou , Shihui Pan, Tingwei Xu, Jicheng Yan, Xin Li and Hao Chen

P34 Development and characterization of fish gelatin/oxidized starch double network edible film catalysed by thermal treatment and Schiff' base reaction

Hao Chen, Yuhao Dong, Peng Qiao, Zijing Liu, and Shuang Qiu

P35 Using of safflower seeds as a protein fortifier of shortbread biscuit

V.S. Kutsenkova, N.V. Nepovinnykh, Qingbin Guo and N.M. Ptichkina

P36 *Aesculus hippocastanum* extract as a potential antibacterial emulsion stabilizer

Maciej Jarzębski, Wojciech Smulek, Przemysław Siejak, Joanna Kobus-Cisowska, Danuta Pieczyrak, Hanna Maria Baranowska, Jarosław Jakubowicz, Mateusz Sopata, Tomasz Białopiotrowicz, Ewa Kaczorek

P37 Effect of chitosan on the foaming and emulsifying properties of the complexes of milk proteins with biologically active lipids

DV Zelikina, SA Chebotarev, MD Gureeva, YV Samuseva, AS Antipova, EI Martirosova, and MG Semenova

P38 Influence of pasteurization treatments on the physico-chemical, microbiological and rheological properties of reconstituted micellar casein concentrates

N Iturmendi, A García, U Galarza, B Martínez, H Lucena, C Barba, I Arozarena, JI Maté

P39 Functional properties of the ternary complexes: maltodextrin–milk protein–essential lipids.

DV Zelikina, MD Gureeva, SA Chebotarev, YV Samuseva, AS Antipova, EI Martirosova, and MG Semenova

P40 Rheological behaviour of micellar casein concentrates solutions

T Flores, N Iturmendi, T Fernández-García, JI Maté

P41 Biopolymer-based nanoparticles: effect of production conditions in size average, polydispersity and zeta potential

G. Azevedo¹, LM Pastrana¹ and MA Cerqueira¹

P42 Effect of molecular weight and k-carrageenan on *Delonix regia* galactomannan film forming solutions properties and films made thereof

W Rodriguez-Canto, L Chel-Guerrero, LM Pastrana, MA Cerqueira, M Aguilar-Vega

P43 Modification of resistant starch nanoparticles using High Pressure Homogenization treatment

Eftychios Apostolidis, Panagiotis Chaloulos, Ioanna Mandala

P44 Drying of fruit of *Opuntia ficus-indica* and the effects on its physical characteristics

Panagiotis Giannopoulos¹, Panagiotis Chaloulos¹, Eftychios Apostolidis¹, Ioanna Mandala¹

P45 Rice bran arabinoxylan and oligosaccharide products for investigating food and immune response function

BJ Savary, K Takahashi, D Kandano, J Xu, and S-O Lee

P46 Animal fat replacer for vegan sausage analogues – influence of protein content on textural and viscoelastic properties of emulsion gels

Johannes Dreher, Monika Gibis and Jochen Weiss

P47 Valorization of *Gelidium sesquipedale* seaweed for the production of polysaccharide-based fractions with interest in food applications

M Martínez-Sanz, JP de Oliveira, LG Gómez-Mascaraque, A Martínez-Abad and A López-Rubio

P48 Development of biomimetic mucus gel material

Mar Collado-González, Yadira González Espinosa and Francisco M Goycoolea

P49 Level of closeness of *Acacia polyacantha* (Kakamut) gum to the gum arabic from *Acacia senegal* (Hashab)

Idris Musa Adam

P50 Comparison on physicochemical properties of non-starch polysaccharides extracted from highland barley by water and alkali extraction

Hao-Ying-Ye Yao, Jun-Yi Yin, Ming-Yong Xie, Shao-Ping Nie

P51 *Asparagus officinalis* polysaccharide fermented with *Lactobacillus plantarum* NCU116: characterization, antioxidative, and bio-activities

Zhi-Hong Zhang, Song-Tao Fan, Dan-Fei Huang, Tao Xiong, Shao-Ping Nie, Ming-Yong Xie

P52 Polysaccharide from the seeds of *Plantago asiatica* L. alleviates nonylphenol exposure induced reproductive system injury of male rats via PI3K/Akt/mTOR pathway

Fen-Fen Li, Dan-Fei Huang, Wei-Yu Yang, Shao-Ping Nie, Ming-Yong Xie

ORAL PRESENTATION P53 Chitosans and cyclodextrin polymers to design new biodegradable antifungal coating

A Loron, C Gardrat, V Atanasova-Penichon, N. Tabary, B. Martel and V Coma

ORAL PRESENTATION P54 Non-invasive evaluation of weighting agent efficiency for beverage emulsion stabilization

C. Tisserand, R. Ramsch, G. Brambilla, G. Meunier

P55 Passive microrheology – A powerful tool for the analysis of low fat formulations stabilised by hydrocolloid

R Ramsch, Y. Nagazi, G. Brambilla, Y. Lefevre, E. Woodcock and G. Meunier

P56 Plant protein efficiency evaluation in food applications

C. Tisserand, R. Ramsch, E Woodcock, G. Brambilla, Y LefevreG. Meunier
